Spring 2007: ENEE 686
Charged Particle Dynamics
MW 12:30 – 1:45 PM

Beams of charged particles are complex systems with nonlinear dynamical properties, and have many important applications in the modern world:

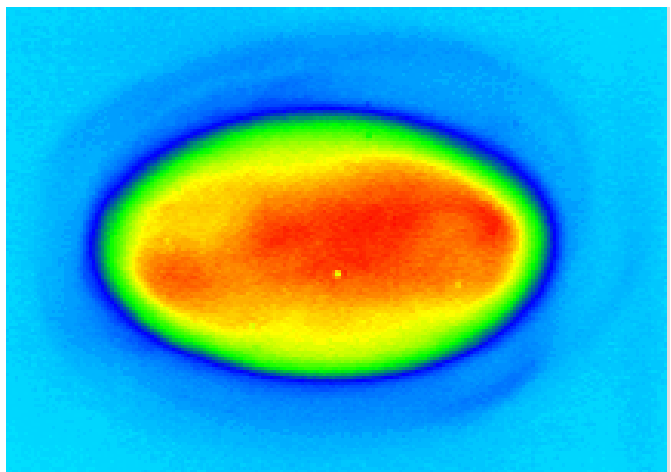

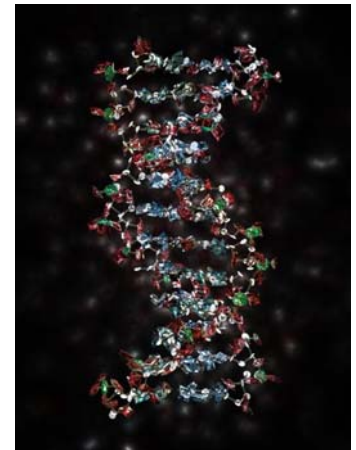

- biosciences and medicine
- nanotechnology
- material characterization
- lasers and microwaves
- energy production

Prof. Rami Kishek

Student evaluations from past classes:

“The teacher is awesome and I recommend this class to anyone!”

“Your presentations have shown your dedication to prepare for every class.”

Prerequisites: Graduate-level Electromagnetism
